Prerequisites:

Node JS : https://nodejs.org/en/download/
Python: https://www.python.org/downloads/
IPFS : https://dist.ipfs.tech/#go-ipfs
truffle: npm install -g truffle   if failed run : npm install -g truffle@5.4.29

download and install git if not installed.
git: https://git-scm.com/downloads

open CMD in Server Directory

```

python -m pip install virtualenv
python -m virtualenv venv
Windows: venv/scripts/activate
For macOs / Linux : source venv/bin/activate
python -m pip install -r requirements.txt
python manage.py migrate
python manage.py runserver

```project setup:
https://youtube.com/playlist?list=PL54V-i7zW55d1VKxEkp9DCPt5k_zE6m3X

open GANACHE and import project
open CMD in the Client Directory

```

npm install --force
truffle migrate
npm start

```

setup metamask before opening the project

open: http://localhost:4200/

**** CLEARING THE SERVER  AND CLIENT ***
in Server dir:python manage.py flush
in CLient :truffle migrate

if any confusion please let me know.

```

IPFS Configuration

Refer: https://github.com/shamil-t/ehr-blockchain/issues/15#issuecomment-1333342345

For starting project 2nd time:

Ganache
Client: npm start
Server: venv/Scripts/activate
        python manage.py runserver
IPFS: ipfs daemon
